TAJNEES QAMAR

Sr. Full Stack Developer

PROFESSIONAL SUMMARY

A versatile and dedicated Full Stack Developer with over 4 years of hands-on experience in designing, building, and maintaining web applications. Proficient in front-end and back-end technologies, including JavaScript, Next, React, Vue, Node.js, and PHP, with a strong focus on developing scalable and efficient solutions. Experienced in managing databases (SQL/NoSQL), working with cloud services such as AWS and Azure, and implementing CI/CD pipelines. Skilled in collaborating with cross-functional teams in agile environments, with a proven background in software quality assurance, ensuring robust application performance and user satisfaction. Committed to continuous learning and delivering high-quality, innovative solutions to meet complex technical challenges.

Well-qualified Full Stack Developer familiar with wide range of programming utilities and languages. Knowledgeable of backend and frontend development requirements. Handles any part of process with ease. Collaborative team player with excellent technical abilities offering 4 years of related experience.

WORK HISTORY

Full Stack Developer, 10/2024 to Current
Remap AI - Brisbane, Capital

- Developed **15+ dynamic and reusable components** using **Vue 3** with a modular architecture, improving code maintainability and reducing development time by **30%**.
- Integrated **RESTful APIs** and **WebSocket** connections, enabling real-time data updates and enhancing user experience across multiple platforms.
- Optimized frontend performance, resulting in **25% faster load times** and ensured responsive UI across **100+ device variants**.
- Designed and implemented **20+ RESTful APIs** and middleware layers using **Node.js** and **Express.js**, achieving seamless client-server communication with a **99.9% uptime**.
- Integrated third-party APIs (e.g., payment gateways, analytics) that improved application functionality and boosted user engagement by **40%**.
- Architected a **highly scalable backend** capable of handling **500k+ concurrent requests**, ensuring low latency under peak loads.
- Implemented robust authentication using **JWT and OAuth**, increasing data security and reducing unauthorized access incidents by **95%**.
- Integrated **ChatGPT** with custom prompt tuning, reducing customer support resolution time by **60%** through AI-assisted automation.
- Leveraged **Bland AI** to power intelligent agent services, streamlining

SKILLS

CSS proficiency

CI/CD Pipelines

Third API integration

RESTful apis development

ReactJS knowledge

Node.js experience

HTML expertise

Responsive web design

Git version control

SQL expertise

JavaScript experience

Sprint planning

Team collaboration

Microservices architecture

Project management

operations and automating **40% of manual workflows**.

- Used **Twilio APIs** for AI-driven SMS and call automation, resulting in a **35% reduction in response time** for customer interactions.
- Collaborated with cross-functional teams including designers, PMs, and DevOps across **10+ agile sprints,** ensuring timely feature delivery.
- Deployed production applications on **AWS and GCP** using **CI/CD pipelines**, reducing deployment errors by **90%** and improving release cycles.
- Conducted **50+ code reviews**, wrote unit tests with **Jest and Mocha**, ensuring **80% test coverage** and enhancing system reliability.
- Led and supervised a team of 3**+ developers and designers**, ensuring performance KPIs were met and deadlines achieved on time.
- Documented architecture diagrams, workflows, and coding standards, improving onboarding efficiency for new developers by **50%**.
- Developed and managed both SQL and NoSQL databases using **Node.js and ORM tools**, improving data query efficiency by **40%**.
- Fostered a collaborative development culture, driving productivity and sprint velocity by **20%** through agile leadership and mentorship.
- Delivered **critical bug fixes and feature enhancements** for release pipelines, improving customer satisfaction and reducing churn by **15%**.

Associate Full Stack Developer II, 07/2022 to 09/2024
Metric - Islamabad

- **Led a front-end team of 4 developers** in designing and implementing a fully responsive UI using **Next.js**, achieving consistent performance across **150+ device types** and reducing front-end bugs by **35%**.
- Developed and maintained **secure, scalable APIs** using **Node.js**, supporting over **200,000 monthly active users** and ensuring **99.9% backend uptime**.
- Conducted **comprehensive unit testing** across front-end and back-end, resulting in a **40% reduction in production issues** and a more stable release cycle.
- Managed **end-to-end deployments on Azure**, integrating **CI/CD pipelines** that reduced manual errors and cut release times by **50%**.
- Collaborated with product, design, and QA teams in **agile sprints**, helping deliver high-quality features on time and maintaining a **95% sprint completion rate**.
- Optimized team workflows by introducing best practices and development standards, increasing productivity by **25%** and improving code review turnaround times.
- Held **weekly customer demo sessions**, gathered direct feedback, and addressed concerns, increasing client satisfaction and contributing to a **15% renewal rate boost**.
- Provided full lifecycle software engineering and maintenance, including bug fixes, enhancements, and performance tuning across all layers of the stack.
- Refactored and modernized legacy codebases, improving maintainability and reducing technical debt by **60%,** while aligning with modern architectural patterns.
- Created detailed documentation and delivered hands-on training for **non-technical stakeholders**, improving system understanding and adoption across departments.

NoSQL databases

Quality assurance

Databases: oracle, MongoDB

JIRA

Full Stack Developer, 09/2021 to 06/2022
ZamSolutions - Islamabad

- Developed **high-performance front-end features** using **React.js**, ensuring seamless responsiveness across **200+ device resolutions** and improving page load speed by **30%**.
- Spearheaded delivery of **custom CMS and content delivery applications** based on client specifications, reducing manual content management effort by **40%**.
- Collaborated with back-end teams to build and integrate RESTful APIs, enabling real-time data updates and achieving **100% synchronization** between client and server layers.
- Partnered with Project Managers and stakeholders to define project scopes, draft detailed technical specs, and deliver features **on time in 95% of sprints**.
- Designed and optimized RESTful web services for dynamic datasets, improving data flow efficiency and reducing API response times by **45%**.
- Researched, tested, and implemented new features, driving **continuous UI/UX improvements** and maintaining high coding standards through code reviews and pair programming.
- Collaborated with backend developers to design scalable APIs, ensuring forward compatibility and ease of integration for future features.
- Diagnosed and resolved complex technical issues, maintaining **99.9% system uptime** and improving user satisfaction through consistent performance.
- Monitored application reliability and implemented proactive measures to reduce downtime incidents by **50%**.
- Improved project visibility and transparency by providing **weekly status reports** and communicating technical blockers and progress to key stakeholders, enhancing decision-making efficiency.

PHP Developer, 09/2020 to 09/2021
ZamSolutions - Islamabad

- Developed and maintained **scalable web applications and CRM systems** using **PHP (CodeIgniter, Laravel)**, improving performance and handling **100k+ monthly user interactions** securely.
- Designed and implemented robust back-end logic, integrating **MySQL and PostgreSQL** databases to manage structured data efficiently, resulting in a **35% improvement in query performance**.
- Built and optimized **complex SQL queries and schema structures**, reducing data access time by **40%** and enhancing system responsiveness.
- Collaborated with front-end developers to create and integrate **RESTful APIs**, achieving seamless client-server communication and reducing front-end development delays by **25%**.
- Participated in peer code reviews and enforced **PHP best practices**, leading to cleaner, more maintainable codebases and a **30% reduction in technical debt**.
- Worked closely with stakeholders and project managers to gather requirements and define scope, delivering **custom CRM solutions** on time and within budget for **10+ clients**.

- Performed rigorous debugging, troubleshooting, and testing, ensuring application stability across **multiple deployment environments**, and reducing post-deployment issues by **45%**.

Fullstack Developer, 01/2019 to 08/2020
Essentia Technologies Pvt. Ltd - Islamabad

- Created and maintained **RESTful web services** to support front-end functionality, enabling smooth data exchange between client and server and reducing integration issues by **30%**.
- Collaborated with senior developers to design **scalable back-end logic and database structures**, contributing to projects that supported **thousands of concurrent users**.
- Assisted in **debugging and resolving critical issues**, improving application functionality and reducing error rates by **20%** across multiple environments.
- Participated actively in **code reviews and team meetings**, gaining hands-on experience with back-end best practices, database optimization, and API design standards.
- Supported day-to-day development operations, maintaining high productivity and **consistent task completion within sprint deadlines**, contributing to a more agile and collaborative development environment.

EDUCATION

Bachelor of Science, Software Engineering, 01/2019 to 12/2019
International Islamic University - Islamabad, IS, Pakistan
